
HariKerja HRMS

Democratizing HR Digitization for UMK, UMM, and Enterprise Tiers with Flat-Tier Pricing.

A modern, highly secure multi-tenant platform targeting a 1 Million Active User milestone by making enterprise-grade features affordable across all business scales.

The HR Tax on Company Growth

The Scaling Penalty

Existing HRIS leaders in Indonesia (such as Mekari Talenta or Gadjian) utilize a Per-Employee pricing model.

As a business grows, its HR software costs grow linearly. This directly penalizes expansion and makes premium HR tools cost-prohibitive across UMK, UMM, and Enterprise segments.

The Manual Alternative

- Spreadsheet Dependency: Over 80% of UMK & UMM businesses rely on manual spreadsheets to manage employee data, attendance, and leave records.
- Compliance Risk: Manual handling of complex BPJS contributions and the latest 2024 PPh 21 TER tax regulations leads to severe compliance errors and financial audits.

HariKerja: Flat-Rate Enterprise HRMS

Disruptive Flat Pricing

Instead of per-employee pricing, we offer standard flat-rate plans starting at just Rp 125,000 /month. Businesses scale without scaling their software expenses.

75% more cost-effective across all tiers

Localized Compliance

Fully localized module for Indonesian regulations including BPJS Health & Employment, plus automated calculations for the latest PPh 21 TER tax rules.

Zero-Config Compliance Engine

Modern ESS Mobile

Native Flutter mobile app featuring offline attendance resilience, coordinate-based smart geofencing, face recognition logging, and secure digital payslips.

Employee Self-Service (ESS)

Market Segmentation & Quotas

Subscription Plan Strategy

- UMK Segment (Essential): Flat Rp 125k/mo. Quota base of 25 seats up to max 100 seats capacity limit.
- UMM Segment (Professional): Flat Rp 350k/mo. Quota base of 100 seats up to max 1,000 seats capacity limit.
- Enterprise Segment (Premium): Flat Rp 1.5M/mo. Quota base of 500 seats up to max 999,999 seats capacity limit.
- Large Enterprise: Custom plans from Rp 5M/mo. Base 2,000+ seats, custom storage, dedicated instances.

1,000,000

Active Users Target

Achieved by capturing just ~2% of Indonesia's 50-60M formal workforce across all business sizes.

1M Active Users Scaling Scenarios

Blueprint baseline (Rp 3.22B MRR)

Rp 3.22 Billion

Gross Revenue / Month

- Requires: 13,500 Tenants
- UMK (Essential): 10,000 tenants
- UMM (Professional): 3,000 tenants
- Enterprise (Premium): 450 tenants
- Dedicated (Large): 50 tenants
- Gross Margin: 70% - 80%
- Aligned with business blueprint

UMK-Dominant (Rp 5.1B MRR)

Rp 5.1 Billion

Gross Revenue / Month

- Requires: 29,360 Tenants
- UMK (Essential): 25,000 tenants
- UMM (Professional): 4,000 tenants
- Enterprise (Premium): 350 tenants
- Dedicated (Large): 10 tenants
- High-volume focus

Enterprise-Dominant (Rp 3.3B MRR)

Rp 3.3 Billion

Gross Revenue / Month

- Requires: 8,560 Tenants
- UMK (Essential): 5,000 tenants
- UMM (Professional): 2,500 tenants
- Enterprise (Premium): 1,000 tenants
- Dedicated (Large): 60 tenants
- High-value focus

Go-To-Market & Growth Strategy

B2B Acquisition Engine

- Search Engine Capture: Focus marketing spend (Rp 20M–500M) on high-intent search keywords (e.g. 'Aplikasi Payroll', 'HRIS Murah', 'TER PPh 21').
- Retargeting Loops: Use Meta and LinkedIn retargeting to maintain top-of-mind recall with HR leaders who visited but didn't convert.
- Educational Content: Drive organic signups by providing compliance calculators and tax guides.

Product-Led Retention

- Self-Service Onboarding: Automated tenant provisioning and database seeding enable instant trial generation, lowering sales costs.
- High Retention (Sticky Product): HRMS products are fundamentally sticky. Once a company embeds its core payroll, attendance, and team configuration in HariKerja, churn remains extremely low.

Secure & Scalable Multi-Tenant Architecture

Enterprise-Grade Infrastructure

- Database Level Security: Hard PostgreSQL schema-per-tenant isolation guarantees zero possibility of cross-tenant data leaks.
- Gateway Whitelisting: Django Admin backend is restricted at Nginx level and accessible only via Private OpenVPN/WireGuard gateways.
- Multi-Factor Authentication: Secure login flow enforces 6-digit TOTP (Google Authenticator) verification for all administrative actions.

Technology Stack

- **Backend Framework:**
Django (Python) & Django REST Framework
- **Database & Cache:**
PostgreSQL (Multi-tenant) & Redis Cache
- **Frontend & Portal:**
Next.js (React) & Vanilla CSS
- **Mobile Client:**
Flutter (iOS & Android) with Offline Cache
- **Security Gateways:**
Nginx, UFW, OpenVPN, WireGuard

CALL TO ACTION

Partner with HariKerja

Let's Scale HariKerja Together

Seeking Seed Round of Rp 3,600,000,000 for 12.5% Equity (Post-Money Valuation: Rp 28,800,000,000 / \$1.8M USD) to secure a 24-month runway, procure core work tools (MacBook Pro/Air & testing devices), expand professional engineering & sales teams, and reach profitability.
